FACTSHEET

FILLING

COMBINED FILLING MACHINE FOR SMALL PACKAGE AND FIBCS

The **combined filling machine** for small containers and FIBC's are used in situations, where bulk has to be filled in small containers as well as in FIBC's. With its combination, a quick changeover is guaranteed - and all this while maintaining the containment. Those filling machines are commonly used in combination with a dosing unit and a sampler.

FACTS

YOUR ADVANTAGES

- Small container and FIBC scale are implemented in the same basic frame
- Filling head with a quick-change system
- Container type changeover within shortest time

OPTIONAL FEATURES

- Pressure regulation (to avoid measurement errors at the weight scale)
- Inertisation and oxygen monitoring
- WIP / CIP-compatible executions
- Execution with decentralized control panel and process instruments

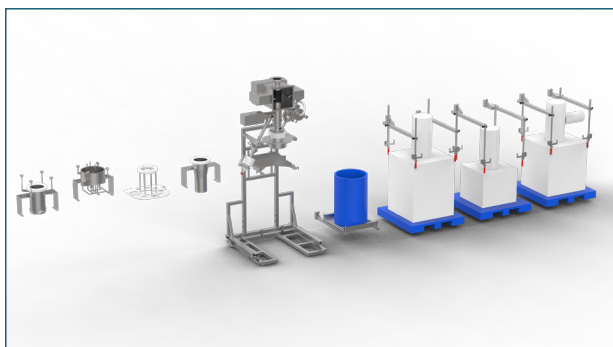

INDUSTRIES

AVAILABLE APPROVALS

CONTAINMENT RATING UP TO OEB 5
